Kabut Labs Employee Handbook

Welcome to Kabut Labs

Kabut Labs is a small hardware and software company in Salatiga, Central Java. We design low-power sensors for homes and small farms and the app that goes with them. There are 34 of us, split across firmware, cloud, mobile, support and operations.

This handbook explains how we work: hours, leave, pay, equipment and the rules we hold each other to. It applies to everyone on a permanent or fixed-term contract. Interns get a shorter version from the People team.

If something here is unclear or out of date, tell the People team at people@kabutlabs.example. We review the handbook every January. This is version 3.1, effective 1 February 2026.

Our office

The office is at Jl. Kemiri Raya 12, Salatiga. It is open from 07:00 to 20:00 on working days. Visitors sign in at the front desk and must be accompanied in the lab area.

Working hours

A full-time week is 40 hours, Monday to Friday. Core hours are 10:00 to 15:00 WIB. During core hours you should be reachable on team chat and available for meetings. Outside core hours you choose when to start and finish, as long as you start between 07:00 and 10:00.

Overtime is not expected. If a release or an incident means you work more than 45 hours in a week, record it in Lumbung (our HR app) and take the time back within the next month.

Remote work

After probation you may work remotely up to three days a week. Agree the days with your lead and keep them in the team calendar. Firmware and hardware roles may need to be in the lab more often during prototype builds.

Working from outside Indonesia needs written approval from the Head of People at least 14 days before you travel, and is limited to 30 days per calendar year. You are responsible for a stable connection during core hours.

Annual leave

Everyone gets 14 working days of paid annual leave per year. Leave builds up monthly, so you earn about 1.17 days for each month worked. New starters can use leave once they have earned it, including during probation.

Request leave in Lumbung. For anything longer than two days, ask at least seven days ahead so the team can plan. Up to five unused days carry over into the next year; carried-over days expire on 31 March.

Sick leave

Tell your lead as early as you can on the day. Sick leave is paid. For absences longer than two consecutive working days we need a doctor's note, uploaded to Lumbung when you are back.

Parental and other leave

Maternity leave is three months, following Indonesian law. Fathers get ten working days of paid paternity leave, to be taken within 60 days of the birth or adoption. Bereavement leave is three working days for a close family member. Public holidays follow the government calendar.

Pay day

Salaries are paid on the 25th of each month. When the 25th falls on a weekend or public holiday, we pay on the working day before it. Payslips are available in Lumbung on the same day.

The religious holiday allowance (THR) is one month's salary and is paid at least 14 days before Eid al-Fitr, earlier than the legal minimum.

Benefits

We register everyone with BPJS Kesehatan and BPJS Ketenagakerjaan from the first day. On top of that, each employee has a learning budget of Rp 6,000,000 per year for courses, books, certifications and conference tickets. Unused budget does not roll over.

People who work remotely at least two days a week receive an internet allowance of Rp 350,000 per month with their salary.

Equipment

You get a laptop, a monitor and a headset on your first day. Equipment stays company property. When you leave, return it within five working days of your last day; the Operations team arranges a courier if you are remote.

IT security

Use the company password manager for every work account and turn on two-factor authentication wherever it is offered. Laptops must lock after five minutes of inactivity and use full-disk encryption.

If your laptop or phone with work accounts is lost or stolen, report it to it@kabutlabs.example within 24 hours, even if you think it will turn up. IT will lock the device remotely and reset your sessions.

Customer data, including sensor readings linked to an address, must never be copied to personal devices or personal cloud storage.

Code of conduct

We expect respect in every interaction: with colleagues, customers, suppliers and the farmers we visit. Harassment, discrimination and bullying are not tolerated, in the office, online or at company events.

Gifts from suppliers or partners worth more than Rp 500,000 must be declared to the People team within a week. Cash gifts of any amount are refused.

Raising a concern

Talk to your lead or the People team. If you would rather not be named, use the anonymous form linked in Lumbung; the form goes to two directors and not to your reporting line. We do not tolerate retaliation against anyone who raises a concern in good faith.

Probation

New employees have a three-month probation period. Halfway through, you and your lead have a check-in to talk about how it is going. At the end, your lead confirms your contract in writing.

Performance and growth

Everyone has a one-to-one with their lead every two weeks. Formal reviews happen twice a year, in June and December, and salary changes are decided after the December review.

Leaving Kabut Labs

The notice period is 30 days after probation and seven days during probation. Your last salary, unused annual leave and any approved expense claims are paid with the next regular payroll.
